

Stage 1: AI exploration roadmap

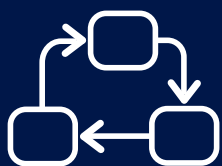

STAGE 1 OF 4

STEP 1**Build your AI use case**

Collaborate with contributors from across your organisation to identify a single, high-impact use case where AI can deliver measurable value.

What is one task in your team that feels repetitive or time-consuming?

**Audit your data landscape**

Clarify what information your solution will need to function effectively, identifying data silos and the implications of connecting previously isolated sources.

STEP 2

What knowledge does this task rely on and where does it live?

STEP 3**Get the green light**

Secure buy-in from key stakeholders, engaging with security and data owners to ensure all sensitive data is accounted for and protected before deployment.

Who will be affected by this project and how can they help shape it?

for Stage 1

**Microsoft 365 Copilot Readiness Assessment**

Assess your environment and build a plan for development.

**AI Risk Assessment**

Identify vulnerabilities to address before AI deployment.
